## PRODUCTION

Miracles of Health considers quality control and quality assurance to be our top priority. All products are manufactured according to Good Manufacturing Practices and are tested to exceed the stringent specifications set forth by the FDA. We test, check, and verify for potency, purity, and consistency to ensure that all products are of highest quality. We remain committed to serving humankind.

## PRINCIPLE

Before a Miracles of Health Product reaches you, a sample is sent from each batch to an independent lab to validate with 100% accuracy that what's on the label is in the bottle. The lab technician checks to ensure that the potency levels will be maintained through the expiration date and then the product is passed with a Certificate of Analysis.
